Behave Test Report

Feature: Login Feature

Background:

@login_wrong_credentials	features/login.feature:7

Scenario: Login with wrong credentials

Given I am on the login page (1.338s)	steps/steps_login.py:3
When I enter "email@yahoo.com" in email field (0.165s)	steps/steps_login.py:7
And I enter "password10" in password field (0.053s)	steps/steps_login.py:11
And I press login button (1.205s)	steps/steps_login.py:15
Then I should see an error message (0.151s)	steps/steps_login.py:31

@login_wrong_email_format	features/login.feature:14

Scenario: Enter wrong email format

Given I am on the login page (0.561s)	steps/steps_login.py:3
When I enter "email.com" in email field (0.231s)	steps/steps_login.py:7
And I press login button (0.076s)	steps/steps_login.py:15
Then I should see an error for valid email request (0.035s)	steps/steps_login.py:19
And I should see an error for password field (0.016s)	steps/steps_login.py:25

@login_only_password	features/login.feature:21

Scenario: Enter only password

Given I am on the login page (0.971s)	steps/steps_login.py:3
When I enter "password2*" in password field (0.276s)	steps/steps_login.py:11
And I press login button (0.083s)	steps/steps_login.py:15
Then I should see an error under email field (0.024s)	steps/steps_login.py:37

@login_empty_fields	features/login.feature:27

Scenario: Enter Intra in cont button with email and password fields empty

Given I am on the login page (0.799s)	steps/steps_login.py:3
When I press login button (0.269s)	steps/steps_login.py:15
Then I should see an error under email field (0.061s)	steps/steps_login.py:37
And I should see an error for password field (0.014s)	steps/steps_login.py:25

Scenario: Enter only email

Given I am on the login page (0.799s)		steps/steps_login.py:3
When I enter "**robert@yahoo.com**" in email field (0.307s)		steps/steps_login.py:7
And I press login button (0.098s)		steps/steps_login.py:15
Then I should see an error for password field (0.055s)		steps/steps_login.py:25

@login_short_password   features/login.feature:39

Scenario: Enter short password

Given I am on the login page (0.782s)		steps/steps_login.py:3
When I enter "**123**" in password field (0.286s)		steps/steps_login.py:11
And I press login button (0.099s)		steps/steps_login.py:15
Then I should see an error for short password (0.056s)		steps/steps_login.py:43

Feature: Register Feature

Background:

@register_with_empty_fields   features/register.feature:7

Scenario: Press ma inregistrez button with all the fields empty

Given I am on the register page (0.864s)		steps/steps_register.py:6
When I press on ma inregistrez button (2.369s)		steps/steps_register.py:41
Then I should see a mandatory fill field error for all the fields (0.030s)		steps/steps_register.py:83

@register_with_correct_credentials   features/register.feature:12

Scenario: Register with correct credentials

Given I am on the register page (0.863s)		steps/steps_register.py:6
When I enter "**Andrei**" in lastname field for registration (0.220s)		steps/steps_register.py:10
And I enter "**George**" in firstname field for registration (0.253s)		steps/steps_register.py:14
And I enter a new email address in email field for registration (0.126s)		steps/steps_register.py:22
And I enter "**parola1234***" in password field for registration (0.074s)		steps/steps_register.py:28
And I enter "**parola1234***" in confirmation password field for registration (0.071s)		steps/steps_register.py:32
And I click on terms and conditions box (2.063s)		steps/steps_register.py:36
And I press on ma inregistrez button (5.254s)		steps/steps_register.py:41
Then I should see a succsessful registration text message (0.081s)		steps/steps_register.py:50

@register_with_same_email | features/register.feature:23
Scenario: Register with same email

Given I am on the register page (1.119s) | steps/steps_register.py:6

When I enter "**Mario**" in lastname field for registration (0.220s) | steps/steps_register.py:10

And I enter "**Alexandru**" in firstname field for registration (0.048s) | steps/steps_register.py:14

And I enter "**mario@yahoo.com**" in email field for registration (0.070s) | steps/steps_register.py:18

And I enter "**1234*mario**" in password field for registration (0.063s) | steps/steps_register.py:28

And I enter "**1234*mario**" in confirmation password field for registration (0.072s) | steps/steps_register.py:32

And I click on terms and conditions box (2.052s) | steps/steps_register.py:36

And I press on ma inregistrez button (3.132s) | steps/steps_register.py:41

Then I should see an error message for using an email that has already been registered (2.031s) | steps/steps_register.py:46

@register_with_wrong_email_format | features/register.feature:34
Scenario: Enter wrong email format

Given I am on the register page (0.810s) | steps/steps_register.py:6

When I enter "**robert.yahoo.com**" in email field for registration (0.382s) | steps/steps_register.py:18

And I press on ma inregistrez button (2.086s) | steps/steps_register.py:41

Then I should see an error for email (0.025s) | steps/steps_register.py:59

@register_with_short_password | features/register.feature:40
Scenario: Enter less than 8 characters on password field

Given I am on the register page (0.830s) | steps/steps_register.py:6

When I enter "**abc12**" in password field for registration (0.365s) | steps/steps_register.py:28

Then I should see an error message for short password (0.014s) | steps/steps_register.py:65

@register_with_wrong_password_characters | features/register.feature:45
Scenario: Enter wrong characters on password field

Given I am on the register page (0.730s) | steps/steps_register.py:6

When I enter "**12345678**" in password field for registration (0.299s) | steps/steps_register.py:28

Then I should see an error for wrong characters on password field (0.122s) | steps/steps_register.py:71

@register_with_different_password_and_confirmation_password | features/register.feature:50
Scenario: Enter different passwords in password and confirmation password fiels

Given I am on the register page (0.722s) | steps/steps_register.py:6

When I enter "**furtuna12345***" in password field for registration (0.159s) | steps/steps_register.py:28

And I enter "**abc**" in confirmation password field for registration (0.193s) | steps/steps_register.py:32

And I press on ma inregistrez button (2.240s) | steps/steps_register.py:41

Then I should see an error for same password on confirm password field (0.023s) | steps/steps_register.py:77
